About me

I'm a third-year student in IT.

Driven by a mathematical and logical mindset, I love tackling complex problems and crafting computer solutions for them.

Passionate about video games since childhood, I recently discovered that I could extend this passion by developing them.

I'm also very active in sports; giving it my all for an hour allows me to blow off steam and stay in good physical shape.

Studies

- Collège du Sacré-Coeur

Primary School

2007 - 2013

- Collège du Sacré-Coeur
